A young girl with curly hair is smiling and looking towards the camera. She is being hugged from behind by an adult whose back is to the camera. The adult is wearing a light green shirt. The background is a classroom with other children and a teacher. The text "WHAT IF I HAVE QUESTIONS" is overlaid on the left side of the image in large, bold, yellow-green letters.

WHAT IF I HAVE QUESTIONS

ABOUT HOW MY
CHILD IS LEARNING?

EARLY STAGES

Early Stages can help. We offer developmental screenings and evaluations for children between the ages of 2 years 8 months and 5 years 10 months who live in the District of Columbia. All of our services are **FREE**.

The experts at our family-friendly center will work with you to identify your child's progress in the following areas:

Communication: how your child understands and uses language

Physical: how your child moves, sees and hears

Cognitive: how your child learns

Social or Emotional: how your child relates with others

Adaptive Skills: how your child performs daily tasks like eating and dressing

The first 5 years of a child's life are the most important to their development. The earlier a child receives services, the more likely it is that their needs will be reduced or even eliminated as they get older. Early Stages can recommend services for children who need them.

Please call (202) 698-8037 or visit www.earlystagesdc.org to refer your child to Early Stages.
